July 11-15, 2005

Dear Teachers,

Thank you for your interest in the Virginia Institute for Archaeology Education summer teacher in-service.

This program is being provided through a partnership of Fairfield Foundation, Colonial Williamsburg Archaeology Department and Historic Jamestowne/APVA Preservation Virginia. Archaeology is an exciting field that is ideal for use in the classroom. Not only history, but math, science, writing and art are easily taught using the everyday methods found in archaeology.

It is the goal of this program to introduce these strategies to K-12 teachers. Most school districts award professional development for just such a program, please check with your own district to assure you can benefit from this professional development opportunity.

Historic site visits, behind the scenes tours, lesson plan development, and hands-on workshops will deliver this new and exciting approach to participating teachers. Join us and learn how to build on an interesting and captivating subject matter, archaeology.

Schedule Summer 2005

July 11 Monday Colonial Williamsburg
**Introduction:
Archaeology in the Classroom**

July 12 Tuesday Historic Jamestowne
